**Press Release – For Immediate release**

**AQORA Launches with UK Bespoke Corporate Accommodation Service**

AQORA a newcomer to the Serviced Accommodation sector is making a splash with two unique offerings in the UK.

With over ten years' experience in the Travel sector Charlie Carr – Head of Business and Property at AQORA says “One of reasons we founded AQORA was to take advantage of the growing demand in corporate travel for bespoke accommodation solutions where none currently exist. Industries which specialise in Infrastructure, energy, construction and related government contracts often find there is a need to house a large mobile workforce for many months in remote locations that aren't supported by traditional accommodation options and this is where we use our connections and experience to develop bespoke housing for our clients.”

Equally as exciting AQORA provide a “wrapped” service for existing serviced apartment operators, utilising the AQORA brand and resources to add a management and service layer. The wrapped service is already being well received and has delivered a steady flow of guests through two properties in Exeter.

AQORA's focus for the next 12 months will be on expanding both the wrapped and bespoke offerings across the UK as serviced accommodation becomes an increasingly well-suited product for any essential business travel in the current climate.
